

Our favorite rain gauge just got better with extended rain data memory.

Features

- Automatic self-emptying rain collector measures and then eliminates collected rainfall
- Wireless transmission range up to 300 feet for rain gauge—100 feet for thermometer
- Displays daily, ten-day historical, and total rainfall records
- Rainfall amounts are shown as inches or millimeters
- High daily rainfall alarm
- Displays outdoor temperature
- Digital Clock

Benefits of a Wireless Rain Gauge

Know how much water you're using to water your lawn, or find out what the latest storm brought to your home. Extremely accurate measurements! Increments of .04 inches will allow you to know precisely how much rain is falling in your area. Avoid the getting wet to monitor rainfall with the included wireless display unit, data is transmitted from a football field away.

Includes

- Main Display Unit
- PCR800 Wireless Self Emptying Rain Collector
- THN802 Wireless Temperature Sensor
- Manual
- Three AA batteries
