The Thermo Scientific™ Eutech™ 1730 Dissolved Oxygen Bench Meter is designed for laboratory users with diverse ranges of technical knowledge who require an easy-to-use and easy-to calibrate meter for routine dissolved oxygen testing. The meter's large, backlit display offers easy-to-view readings and the meter's small footprint reduces its required bench space. This DO meter is ideally suited for simplified, economical lab testing.

Analyze dissolved oxygen as percent saturation, concentration in mg/L or concentration in ppm simultaneously with temperature using the Eutech 1730 DO Bench Meter. Measure dissolved oxygen in a range of 0.0 to 300.0 % saturation, 0.00 to 30.0 mg/L or ppm and measure temperature in a range of -5.0 to 105.0 °C. Perform 100% saturation, 0% saturation and custom concentration calibrations for dissolved and one-point temperature adjustment calibrations.

Use the onscreen stabilizing and ready indicators to help identify when DO meter readings are complete. View active dissolved oxygen and temperature calibration logs with date and time stamp to ensure accurate, reproducible measurements. Record key measurements using the 500-point data log with date and time stamp. Output data logs and calibration logs to a printer or computer for long-term data storage.
